CAMFIX

Endmill Holders with CAMFIX C5 Adaptation

CAMFIX

Highlights

Following market demands, ISCAR is expanding the line of endmill holders to include CAMFIX C5 adaptation for inch (Imperial) dimensions.

The new endmill holders enhance the existing line of holders with CAMFIX C6 connections and have been designed for new generation compact machining centers, which combine high productivity and precision with superior performance.

The CAMFIX system features high accuracy, excellent rigidity against bending forces, stability and high torque transfer. This is achieved due to the polygonal cone face contact.

CAMFIX

C#-EM

DIN 1835 Form B Weldon Endmill Holders with CAMFIX (ISO 26623-1)
Exchangeable Tapered Shanks
